Welcome

The Land use Reclamation And Maintenance database software contains powerful functions to enable you to locate construction and agricultural equipment suppliers across the United States.

This demo will introduce the key functions of this software.

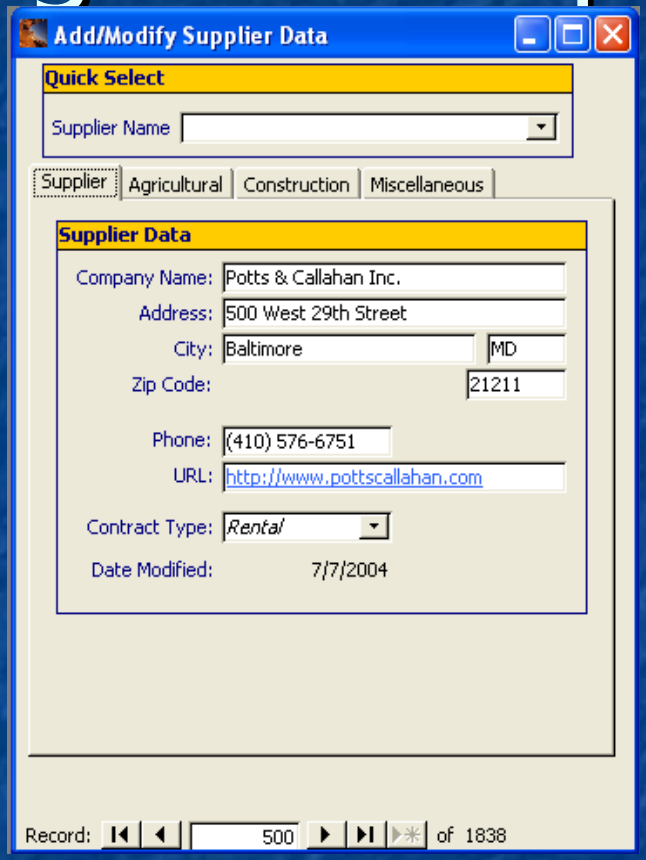
Features

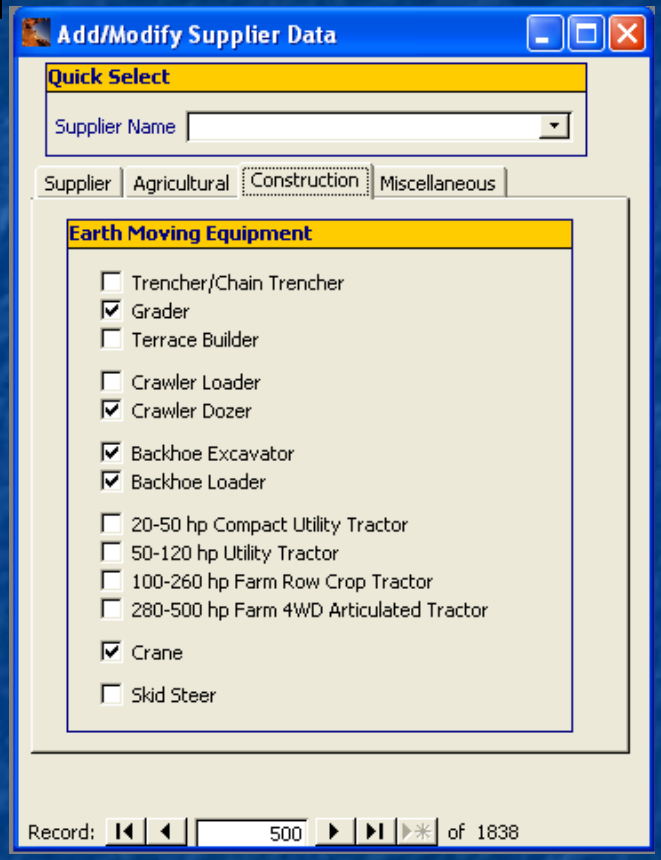
With **LRAM** software, you can view detailed information about every known equipment supplier in the United States, locate the nearest equipment suppliers in your region, view contact information for national suppliers, and print customized data reports .

Regional Suppliers

LRAM software allows you to view the contact information and equipment inventory for every known equipment supplier in the United States.

The Quick Select feature allows you to quickly locate the profile of a specific supplier.

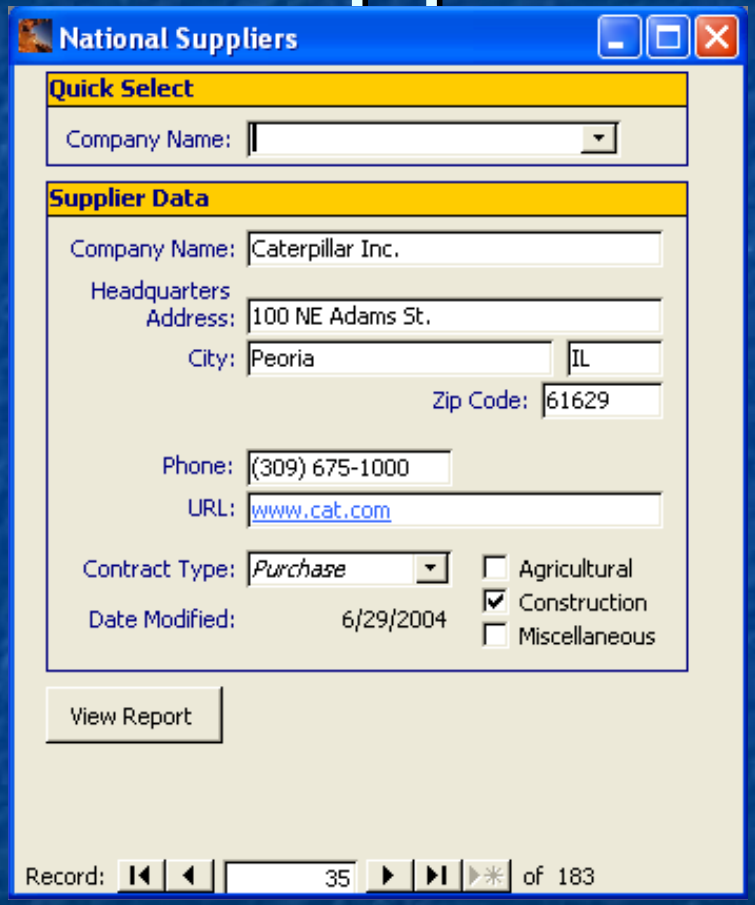




National Suppliers

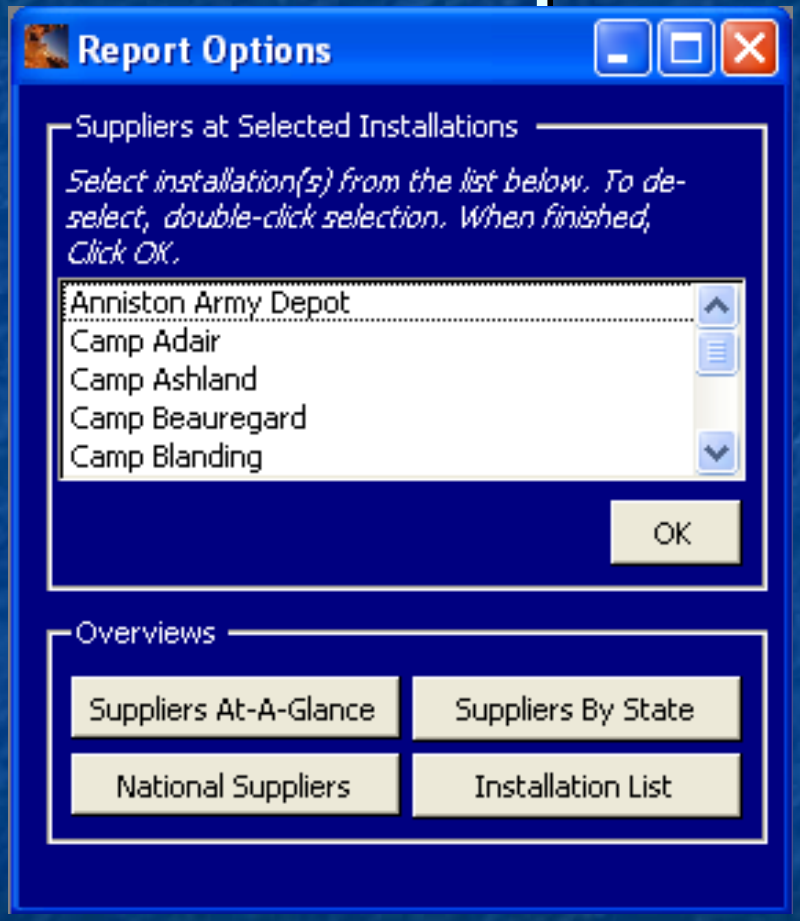
LRAM software allows you to view the contact information and equipment specialty of every known national equipment supplier in the United States.

The Quick Select feature allows you to quickly locate the profile of a specific supplier.



Custom Reports

With **LRAM** software, you can view and print customized reports based on your location or equipment needs.



Installation Reports

You can view a detailed report of all the equipment suppliers within 100 miles of your location.

The nearest suppliers appear first on the list.
